INTRODUCTION

The world of collecting has always been a fascinating and valuable sector, but one traditionally accessible only to a select few with substantial financial resources. Works of art, rare objects and unique pieces require significant capital to acquire, as well as specialist knowledge and access to markets often reserved for a small circle of collectors. For many years, this has made collecting an elite pursuit, largely inaccessible to the general public.

With the advent of blockchain technology and NFTs (Non-Fungible Tokens), the sector is undergoing a profound transformation. Thanks to these innovations, it is now possible to digitise works and collections, certifying their authenticity, ownership and uniqueness through transparent records on the blockchain. This new model makes collecting more accessible, opening the doors to a global audience interested in digital art and digital assets.

It is within this context that VCC Luxury was born, a project designed to revolutionise the world of digital collecting through Virtual Crypto Coin (VCC). The VCC token is designed to allow anyone to access exclusive digital collections and participate in an innovative ecosystem that combines art, collecting and community.

The project combines several key elements: digital art, collecting, blockchain technology and the decentralised economy, creating a dynamic environment in which users can collect and trade digital artworks. In this way, VCC Luxury offers not only an entertainment experience centred on collecting, but also the opportunity to take part in a new way of collecting based on digital assets.

PROJECT VISION

VCC Luxury's vision is to create a global community of digital collectors, where everyone can easily access the world of digital art, own unique works and trade them using blockchain technology. Within this ecosystem, artworks are represented as NFTs (Non-Fungible Tokens), digital assets that certify the authenticity, ownership and uniqueness of each piece. Thanks to this technology, collecting is no longer limited to a select elite, but becomes an experience open and accessible to a global audience of enthusiasts, collectors and creators.

The project was launched with the aim of transforming the way people interact with art and collecting, harnessing the potential offered by blockchain and the digital economy. One of VCC Luxury's main objectives is, first and foremost, to democratise collecting, making it accessible to everyone and allowing even those with limited capital to participate in this market. At the same time, the project aims to create new ways to take part in digital art, offering users the chance to collect digital artworks.

Another key objective is to build a global platform that connects artists and collectors, fostering the creation of an active and engaged community. Within this environment, artists can showcase their digital creations to an international audience, whilst collectors have the opportunity to discover and acquire unique works.

In the long term, the project aims to establish VCC as a recognised token in the NFT market, by developing a robust, innovative and sustainable ecosystem capable of developing over time thanks to community participation and the evolution of the digital market.

THE PROBLEM

In the real world, collecting is often constrained by various factors that make it difficult for most people to access this sector. Among the main obstacles is, first and foremost, the high cost of artworks, which often requires substantial investment, accessible only to collectors with significant financial resources. Added to this is limited access to galleries, exhibitions and private collections, which in many cases are frequented mainly by industry experts or a select circle of enthusiasts. Finally, traditional art markets are often inaccessible to the global public, as they are tied to specific geographical contexts or market dynamics that are difficult to understand for those outside this milieu.

Consequently, many art and collecting enthusiasts do not have the opportunity to purchase major works or to engage directly with emerging and established artists. This limits not only the opportunities for collectors, but also those for artists, who often struggle to find new channels to showcase and promote their creations.

VCC Luxury was founded with the specific aim of overcoming these barriers by creating an innovative digital ecosystem based on blockchain technology. Within this platform, artists of all levels will be able to collaborate, showcase and offer their works to a global community of users. The works can be digitised and certified via blockchain, supporting authenticity, ownership and traceability.

In this way, anyone will be able to collect digital works in the form of NFTs in a simple and transparent manner, participating in a new model of collecting that is accessible globally and open to an ever-wider community of enthusiasts.

THE VCC LUXURY SOLUTION

VCC Luxury proposes the creation of a comprehensive and innovative NFT ecosystem, designed to integrate digital art, blockchain technology and collecting within a single platform. At the heart of this system lies Virtual Crypto Coin (VCC), the token that will serve as the primary currency of the entire project and enable users to access the platform's various features and purchase digital artworks in the form of NFTs.

By forging strategic partnerships with artists, digital creators and galleries, VCC Luxury aims to develop a catalogue of exclusive digital artworks, offering users the chance to discover and collect unique creations. The project involves the creation of exclusive NFT collections, designed to offer rarity and authenticity. In parallel, digital auctions will be organised, through which collectors can compete to acquire particularly rare or limited-edition works.

Another key element of the ecosystem will be the creation of a dedicated marketplace, a digital space where users can buy, sell and trade NFTs easily. The platform will also offer a range of ways for users to take part in the project and in the digital art market.

All NFTs within the ecosystem can be purchased exclusively using the VCC token. This model aims to create a virtuous economic cycle, in which the growth of the community, interest in the collections and marketplace activity may support the development of the entire VCC Luxury ecosystem.

TECHNOLOGY

The VCC token is built on the BNB Chain, utilising the BEP-20 standard, one of the most widely used protocols in the cryptocurrency world for creating tokens on the blockchain. This technological choice enables the project to leverage a robust, efficient infrastructure that is already widely adopted within the crypto ecosystem, facilitating integration with wallets, exchange platforms and decentralised applications.

The BNB Chain offers numerous operational and technological advantages. Firstly, it offers low transaction fees, allowing users to buy, sell or transfer tokens without incurring high costs. This is a fundamental aspect for a platform based on NFTs and digital collectibles, where transactions can be frequent. Furthermore, the network offers high transaction processing speeds, enabling rapid transactions and a smoother user experience within the ecosystem.

A further advantage is its compatibility with numerous wallets and platforms, such as the leading digital wallets and decentralised exchanges that support the BEP-20 standard. This makes the VCC token easy to use and accessible to a wide range of users from all over the world.

The project also involves the use of public smart contracts, programmed on the blockchain and freely accessible. This approach supports transparency and verifiability, allowing the community to monitor the token’s operational logic and strengthening users’ trust in the entire VCC Luxury ecosystem.

TOKEN INFORMATION

The main technical data of the VCC token are summarised below. They match the data recorded on the BNB Chain and published on our official website.

Name: Virtual Crypto Coin

Symbol: VCC

Network and standard: BNB Chain, BEP-20

Decimals: 18

Contract address: 0x040385ad4fd6d360a29209dc911b1808ec138efa

Total supply, fixed: 1,000,000,000,000,000,000 VCC

Burned (about 10%): about 100,000,000,000,000,000 VCC

Contract owner address (as returned by the contract):
0x4240cba1cf9c984732b60de511f8f77fdb1af31d

Before interacting with VCC, always check the contract address above on the block explorer and on www.vccluxury.com.

HOW THE SYSTEM WORKS

The VCC token is at the heart of the entire VCC Luxury ecosystem, playing a central role in all the platform's activities. Through this token, users can access the project's key features and actively participate in the world of digital collecting. In particular, VCC holders will be able to purchase NFTs, take part in digital auctions, access exclusive collections and interact with the community within the platform.

The VCC token is therefore not merely a payment instrument, but becomes a fundamental element for interaction between users, artists and collectors. Thanks to its use within the ecosystem, a dynamic environment is created in which community participation contributes directly to the development and growth of the project.

Every VCC transfer, including buys and sells, currently pays a 10% fee set in the contract: 1% distributed to holders, 4% set aside in the contract for liquidity, 5% to the development wallet. The project undertakes never to raise the total fee above 10% and will consider reducing it. This is a commitment by the project: the contract currently has no maximum limit and the owner can technically change the fee. The project intends to support the development of the ecosystem through collaborations with artists aimed at creating new digital collections, marketing and promotional initiatives designed to expand the community and increase the platform's visibility, and token burn operations.

The token burn process involves the permanent removal of a certain quantity of tokens from circulation. Token burns permanently reduce the circulating supply. They do not guarantee any change in the token's price or value.

All rights reserved | 2024 VCC Virtual Crypto Coin

TOKEN UTILITY

The VCC token plays a central role within the VCC Luxury ecosystem, offering users a range of features. Thanks to the token, users can purchase NFTs, access exclusive digital collections, actively engage with the community and participate in the project's governance, thereby contributing to decisions that influence its development and evolution. VCC is designed as a utility token for use within the VCC Luxury platform. It does not represent shares, debt or ownership in any company, and it does not entitle holders to profits, dividends or any share of the project's revenue.

A distinctive feature of VCC's economic model is the redistribution of value generated within the platform. A portion of the revenue from NFT sales is used to reduce the total token supply through token burns. This mechanism gradually decreases the amount of VCC in circulation. It does not guarantee any change in the token's price or value, and holders should not expect any financial return.

All rights reserved | 2024 VCC Virtual Crypto Coin

TOKENOMICS

The total supply of VCC is 1,000,000,000,000,000,000 VCC and it is fixed: the contract cannot create more. About 10% has already been burned. The project aims to reduce the circulating supply through strategic burns.

These shares are the distribution plan. Today about 90% of VCC is in the founder's wallet and about 10% has been burned. The addresses of the allocation wallets will be published on the official website. The proposed distribution is as follows:

- 40% allocated to the community and the market, to incentivise participation, purchases and trading within the platform;
- 20% reserved for liquidity, to support the stability and functionality of the token in the markets;
- 15% allocated to project development, including technology, infrastructure and future innovations;
- 10% for marketing and strategic partnerships, aimed at expanding visibility and collaborations;
- 10% for the team, as an incentive for their contribution and the long-term management of the project;
- 5% as a strategic reserve, to address any future opportunities or unforeseen events.

The actual distribution can be checked at any time by anyone on the BNB Chain block explorer; up-to-date information on the supply and its distribution is published on the official website www.vccluxury.com.

All rights reserved | 2024 VCC Virtual Crypto Coin

ECOSYSTEM ECONOMICS

The VCC Luxury ecosystem is built on an integrated model that combines digital art, community and sustainable tokenomics. The key elements of the project include NFT sales, which represent the platform's economic engine; community growth, which increases demand and interest in digital artworks; artistic collaborations, which enrich the offering with exclusive creations; and the expansion of available collections, which broadens collecting opportunities for users.

A strategic aspect of the economic model concerns liquidity management: 10% of every NFT sale is allocated to the project's liquidity fund, supporting the liquidity of the VCC token. This mechanism aims to foster a healthy ecosystem in which the interests of the community and artists are aligned and contribute to the platform's overall development.

All rights reserved | 2024 VCC Virtual Crypto Coin

ROADMAP

The VCC Luxury roadmap is structured in progressive phases, designed to develop the ecosystem in a robust and sustainable manner, aiming at community engagement and the development of the project. The roadmap is indicative: timing and content may change.

Phase 1: this initial phase involves the creation of the VCC token and the formation of the operational team, with the aim of laying the foundations of the project. In parallel, the project will work to grow its community, without using artificial or incentivised trading.

Phase 2: the focus shifts to infrastructure development and initial operational activities. The official website will be launched, followed by the creation of the NFT marketplace, which will allow users to buy, sell and trade digital artworks. This phase will also see the start of the first collaborations with artists, to enrich the offering with exclusive collections and build the platform's reputation in the world of digital art.

Phase 3: involves applying for listing on platforms such as CoinMarketCap and CoinGecko, subject to their approval, in order to increase the visibility of the VCC token and make it accessible to a wider audience of collectors.

Phase 4: focuses on expanding the ecosystem and growing the community. New NFT collections will be launched, artistic partnerships will be strengthened, and initiatives will be implemented to boost user participation and engagement.

The ultimate goal is to establish VCC as a recognised token in the NFT market, creating a comprehensive and sustainable ecosystem in which art, digital collecting and tokenomics are closely integrated, creating opportunities for the community and for all project participants.

All rights reserved | 2024 VCC Virtual Crypto Coin

GOVERNANCE

VCC Luxury's governance structure is designed to balance the team's expertise with community participation, ensuring transparency and engagement. In the initial phase, key strategic decisions will be made by the founder, with the aim of establishing the operational foundations and defining the project's priorities.

Once the community is established, VCC holders will have the opportunity to actively participate in decision-making through a voting system proportional to the number of tokens held, allowing them to express preferences regarding developments, new NFT collections, partnerships and other strategic initiatives. This model ensures that the community's voice is directly proportional to its commitment to the ecosystem, promoting accountability and active participation.

Communication with the community will be facilitated through dedicated official channels, with regular updates on the roadmap, artistic news, marketing initiatives and project progress. In this way, VCC Luxury aims to create a transparent ecosystem, where users are always kept informed and can contribute to the development of the project.

SECURITY

As of the date of this document, no independent audit report of the VCC smart contracts has been published. An independent audit by a specialised firm is planned and, once completed, its report will be published on our official website. An audit reduces risk but cannot guarantee that a smart contract is free from errors or vulnerabilities.

The VCC token contract is deployed on the BNB Chain, where its address is public and its activity can be checked by anyone on the block explorer (BscScan). Users should always verify the contract address published in this document and on our official website before interacting with VCC, and should beware of fake tokens, fake websites and phishing attempts.

TEAM AND PARTNERSHIPS

VCC Luxury is led by its founder, Vincenzo Mamone, who is publicly identified: his professional profile is available in the Team section of the official website, www.vccluxury.com. External collaborators support technology, marketing, art and community; their profiles will be published when they formally join the project.

The project also envisages numerous collaborations with artists and galleries, aimed at creating exclusive digital collections and expanding the ecosystem, thereby strengthening the bond between creators, collectors and the global VCC Luxury community.

All rights reserved | 2024 VCC Virtual Crypto Coin

COMMUNITY

The community is at the heart of VCC Luxury, as the project's success depends directly on user participation and engagement. Official announcements are published on the channels listed on our official website, www.vccluxury.com (Telegram, X, Facebook and Instagram). The project will never ask for private keys or seed phrases, and will never send private messages asking users to transfer funds.

In addition, social media and B2B artistic partnerships will also be utilised as strategic tools to broaden the project's visibility, engage new users and strengthen ties with artists, galleries and industry stakeholders. This multi-channel structure enables a constant and transparent dialogue, ensuring that the community is always informed and plays an active role in the development and growth of the VCC Luxury ecosystem.

HOW TO GET VCC

VCC can currently be bought by swapping BNB on PancakeSwap. The project is not selling VCC directly. With the 10% fee, slippage on PancakeSwap must be set to at least 10%. Always verify the contract address before buying.

Participation may not be permitted in some countries: it is each participant's responsibility to check that they are allowed to take part under the laws that apply to them.

All rights reserved | 2024 VCC Virtual Crypto Coin

RISK FACTORS

Acquiring or using VCC involves significant risks. Please read the following carefully.

Loss of capital. Crypto-assets are highly volatile. The value of VCC can fall sharply or to zero, and you may lose all the funds you use to acquire it. Only use funds you can afford to lose.

No guaranteed return or liquidity. Nothing in this document promises any profit, price increase or resale value. At times there may be no market for VCC and you may be unable to sell it.

Technology risk. Smart contracts, wallets and blockchains can contain errors or be attacked, and blockchain transactions cannot be reversed. As of the date of this document, no independent audit report has been published.

Project risk. The roadmap is indicative. Features such as the marketplace, the auctions and governance may be delayed, changed or not delivered.

Regulatory and tax risk. Rules on crypto-assets, including Regulation (EU) 2023/1114 (MiCA), may change and may restrict the offer or use of VCC in some countries. Tax treatment depends on your jurisdiction.

Scams and impersonation. Fake tokens and fake websites may copy the VCC name. Always verify the contract address and our official channels, and never share your private keys or seed phrase.

All rights reserved | 2024 VCC Virtual Crypto Coin

LEGAL NOTICE

Nature of VCC. VCC is designed as a utility token for use within the VCC Luxury platform, for example to purchase NFTs and to take part in auctions and governance. It does not represent shares, debt or ownership in any company, and it does not entitle holders to profits, dividends or any share of the project's revenue.

Information only. This document is for information purposes only. It is not a prospectus, an offer of securities or financial instruments, or financial, investment, legal or tax advice. Seek independent professional advice before making any decision.

Restricted jurisdictions. Participation may not be permitted in some countries. It is each participant's responsibility to check that they are allowed to take part under the laws that apply to them.

Forward-looking statements. Statements about plans, objectives and the roadmap reflect current intentions and are not guarantees. Actual results may differ.

Updates. This is version 1.3 of the document (November 2026). The latest version is published on www.vccluxury.com.

Contacts. VCC Luxury is a project led by its founder, Vincenzo Mamone. Official website: www.vccluxury.com. Email: info@vccluxury.com.

All rights reserved | 2024 VCC Virtual Crypto Coin

CONCLUSION

VCC Luxury is an innovative project that combines collecting, digital art and blockchain technology, opening up new opportunities in the world of modern collecting. Through Virtual Crypto Coin (VCC), the project aims to create a global ecosystem where anyone can take part in digital collecting, purchase unique works, and become an active part of an international community of enthusiasts and collectors.

The main objective of VCC Luxury is to build a platform where art, collecting and community coexist, offering accessible tools for collecting NFTs, participating in digital auctions and interacting with artists and collectors. In this way, the project transforms traditional collecting, making it democratic, inclusive and sustainable, and allowing an ever-wider audience to experience digital collecting in an engaging and rewarding way.
